

RD 1-15 Salt Mill Machine, Grinder Type

G-grinder

Mechanism of G-grinder

This model is recommended for unique characteristic of Kiritimati Solar Salt. Milling capability varies on water content of salt. As Kiritimati Solar Salt contains high water and mineral, which is why it tastes very good, however, use of a normal screen mill is not favourable as it reduces useful life of the machine by clogging the screen.

This mill's grinder called G-Grinder grinds the salt into approx. 1mm without use of the screen.

Specification Information:

Milling capability: 5-100kg/h
Power: 420V, 3-phase, 1.5KW
Size: 270x560x880(H)mm
Weight: 95kg
